Gocator, 2410/2420

ALL-IN-ONE 3D SMART SENSORS

Gocator 2410 and 2420 3D smart sensors are designed for the exacting demands of electronics and medical component inspection. With the latest 2 MP imaging technology and a new processor, these sensors achieve fast scan speeds, the highest X resolution in the industry and excellent Z repeatability (0.2 μ m). Plus, their use of blue lasers means they generate "cleaner" data and highly reliable results even on shiny surfaces.

- PRE-CALIBRATED TO SCAN MICRON-LEVEL DETAILS
- X RESOLUTION DOWN TO 6 μm
- DOUBLE THE SPEED OF GOCATOR 2300
- SETUP & CONTROL VIA WEB BROWSER OR SDK
- BUILT-IN TOOLS, NO PROGRAMMING
- EXTEND WITH GDK AND ACCELERATOR

TAKE MICRON-LEVEL MEASUREMENTS

Measure micron level features with the 2400's 2 megapixel camera and large field of view. Scan parts for even the smallest defects and achieve superior results for 3D quality inspection.

INSPECT WITH SPEED AND PRECISION

Faster scan and acquisition speeds empower you to speed up your inline process and use higher resolutions. It also means multiple exposures can be used to accurately measure high-contrast targets. With an X resolution down to 6 μ m, you can generate data points even on very tiny edges or narrow gaps.

LEVERAGE A GREATER MEASUREMENT RANGE

Accomplish more with fewer sensors, while still capturing the finest surface and edge details of electronics and small parts with the 2400's large field of view. Its deep measurement range lets you handle a wider variety of parts at production speed.

Gocator 2490

3D SMART LASER LINE PROFILE SENSOR

- 2 m field of view and large measurement range provide scan area of 1 m × 1 m at 800 Hz
- 2.5 mm XYZ resolution for complete dimensional measurement (W×H×D) at conveyor speeds of 2 m/s
- Built-in measurement tools and PLC interfaces result in lower total system cost

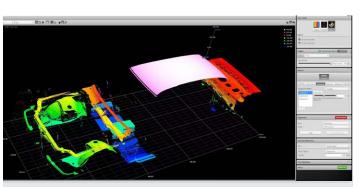

Gocator® 2490 is designed to scan large targets in packaging & logistics, automotive manufacturing, and food processing applications. The sensor leverages an ultra-wide field of view and large measurement range to achieve an extensive scan area, allowing engineers to perform complete dimensional gauging and high-resolution 2D/3D quality inspection of large targets at inline production speed.

HIGH-RESOLUTION 3D SCANNING AT PRODUCTION SPEED

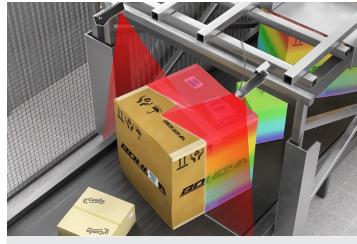

For packaging & logistics applications, the 2-megapixel imager allows Gocator 2490 to scan and measure 1 m × 1 m packages at a rate of 800 Hz and resolutions of 2.5 mm in all three dimensions, even at conveyor speeds of 2 m/s. Competing systems typically offer just 3-5 mm resolution in the X, Y, and Z axes.

LARGE SCAN AREA

The combination of wide field of view and large measurement range enables engineers to cover a scan area up to 1 m × 2 m for handling a variety of large targets (e.g., automotive body frame inspection and transverse board scanning). In addition, high Z resolution (for height measurement) makes the 2490 well suited to applications such as food quality control and optimization.
