## Gocator® 3504 3D SMART SNAPSHOT SENSOR

- PRE-CALIBRATED, 6.7  $\mu\text{m}$  XY RESOLUTION 3D DATA IN A SINGLE SNAPSHOT
- ACCURATE 3D MEASUREMENT WITH BLUE LIGHT PROJECTION
- INDUSTRIAL DESIGN FOR LONG LIFE
- REMOVES COST OF LINEAR MOTION SYSTEMS AND MINIMIZES ERROR DUE TO VIBRATION

Gocator 3504 is the highest-resolution 3D snapshot sensor on the market today. Its combination of 6.7  $\mu\text{m}$  XY resolution and 0.2  $\mu\text{m}$  Z repeatability make this sensor ideal for detailed inline inspection of small electronic parts. An industrial stereo camera design helps see more of the part while delivering exceptional measurement stability.

### HIGH ACCURACY WITH START-STOP MOTION

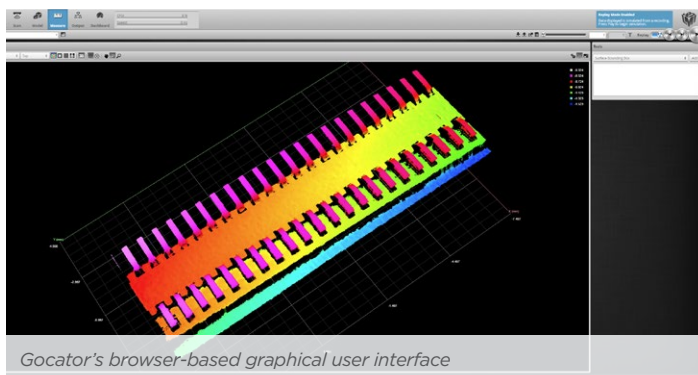

Gocator 3504's 5-megapixel stereo camera reduces occlusion and allows you to measure tiny features in a single snapshot, with the highest resolution and accuracy for an industrial structured light sensor on the market today.

### INLINE INSPECTION READY WITH FASTER PROCESSING

Single sensors require no additional controllers or PCs to produce 3D measurements. The sensor's new dual-core controller and onboard hardware acceleration allow for inline production speeds. For time-critical applications, Gocator 3504 can be further accelerated up to 4x faster using GoMax smart vision accelerator.

#### HIGH ACCURACY

The sensor's stereo 5-megapixel camera lets you measure small features in a single snapshot, with the highest resolution and accuracy for an industrial structured light sensor on the market today. With snapshot sensors, the target is stationary during acquisition effectively minimizing the cost of expensive motion system components (such as encoders) and the associated errors due to vibration.

#### INLINE INSPECTION READY WITH FASTER PROCESSING

The sensor's new dual core controller and onboard hardware acceleration allows for inline production speeds. Using Gocator Accelerator (GoX), the Gocator 3506 runs up to 4x faster than sensor only operation to achieve inline scan rates of 3 Hz.

#### EASY TO USE

Gocator's built-in GUI provides an intuitive setup experience, using any web browser, computer or operating system. No additional software is required.

#### INDUSTRIAL PACKAGE, COMPACT, AND LIGHTWEIGHT

Gocator's rugged IP67 housing, small form factor, and light weight make it ideal for fitting into small spaces and mounting on robots.

#### INDUSTRIAL PROJECTOR FOR LONG LIFETIME

The sensor's LED light source makes it easier to work with than lasers. The bright LED and industrial design enables shorter exposures, so you get measurements faster with an expected lifetime of up to 10 years of continuous operation.
