## KX SERIES

## MEDIUM FORCE ROLLER SCREW ACTUATOR

Mount virtually any servo motor
Long stroke lengths available
High speed and long life

Motors shown in photos are for illustrative purposes only and are not included with KX Series Actuators

## KX Series

## Linear Actuators

Exlar KX Series actuators offer advanced roller screw technology in varying performance levels and allow the use of third-party motors.

## A Universal Design for Ultimate Flexibility

The KX Series actuator provides an ideal replacement for pneumatic and hydraulic cylinders in linear motion control applications. Unlike most suppliers who employ ballscrews, Exlar KX Series linear actuators utilize a planetary roller screw, assuring long life and high resistance to shock. This feature makes Exlar actuators far superior to alternative methods for applying all-electric linear actuation in industrial and military applications.

| Operating Conditions and Usage |  |  |
| :--- | :--- | :--- |
| Efficiency: | $\%$ | 80 |
| Motor Inline | $\%$ | 80 |
| Motor Parallel |  |  |
| Ambient Conditions: |  |  |
| Standard Ambient Temperature | ${ }^{\circ} \mathrm{C}$ | 0 to 65 |
| Extended Ambient Temperature* | ${ }^{\circ} \mathrm{C}$ | -30 to 65 |
| Storage Temperature | ${ }^{\circ} \mathrm{C}$ | -40 to 85 |
| IP Rating |  | IP65S |

*Consult Exlar for extended temperature operation.

KX Series actuators are offered in 60,75 and 90 mm frame sizes with dimensions and form-factor consistent with ISO Metric pneumatic cylinder specifications. This allows convenient substitution of Exlar actuators for existing pneumatic and hydraulic actuators.

KX Series actuators provides high performance planetary roller screw performance that is far superior to any other available rotary-to-linear conversion technologies. The KX Series is the ideal choice for demanding applications in industrial automation, mobile equipment, military, process control, or many other applications where millions of inches of travel under load is expected.

| Technical Characteristics |  |
| :--- | :--- |
| Frame Sizes in (mm) | $2.3(60), 2.9(75), 3.5 \mathrm{in} \mathrm{(90)}$ |
| Screw Leads in (mm) | $0.19(5), 0.4(10)$ |
| Standard Stroke Lengths <br> in (mm) | $5.9(150), 11.8(300), 23.6(600), 35.4(900)$ |
| Force Range | up to $3,500 \mathrm{lbf}(15 \mathrm{kN})$ |
| Maximum Speed | up to $32.8 \mathrm{in} / \mathrm{sec}(833 \mathrm{~mm} / \mathrm{s})$ |

[^0]
## KX Series Linear Actuators

## The Exlar Advantage

## Universal Mounting Options

The KX Series offers a wide variety of fixed and adjustable mounting accessories consistent with NFPA inch and ISO Metric pneumatic cylinder standards. The mounting options include:

| - Front Flange | - Adjustable Side Trunnions |
| :--- | :--- |
| - Rear Flange | - Rear Clevis |
| - Foot Mount | - End Angles |
| - Rear Eye |  |

## Standard Actuator Construction

The standard KX Series actuator design includes an anodized aluminum housing offering a high level of corrosion resistance in many environments. The standard main rod is plated steel with a stainless steel rod end insert, providing excellent wear characteristics.

## Sealed Body Design

The standard body design of the KX Series provides an IP54S sealed housing. IP65S sealing is standard when an inline or parallel motor mount is specified. This feature allows the actuator to be used in applications where water spray is present.

## Motor Mounting Options

The KX Series allows for complete flexibility in the type and style of motor to drive the actuator. Types of motors compatible with KX Series actuators include DC motor, stepper, and servo motors. The KX Series can be ordered as a base unit without motor mounting, allowing you to manufacture your own mount.

For convenience these actuators are available with preconfigured motor mounts. Exlar maintains a large library of motor mounting dimension information for most manufacturers' servos and stepper motors.

The inline mount places the motor on the input end of the actuator and allows the most compact form factor. In addition, Exlar offers a clevis mount attached to the rear of the inlinemounted motor for rear mounting.

The parallel motor mounts (side mount) utilize a belt drive system to transmit the motor torque to the actuator input shaft. Belt reductions of $1: 1$ and $2: 1$ are offered, allowing you to conveniently match the speed and output force to properly apply your KX Series actuator to your specific application.

## KX Series Linear Actuators

## Product Features

1-Male, US Standard thread
2-Male Metric thread
3-Female US Standard thread
4-Female Metric thread
5-Drive shaft only, no motor moun
6 -Inline, includes shaft coupling
7-Parallel, 1:1 belt reduction
8-Protective bellows for extending rod
9-External Limit Switches - N.O., PNP 10-External Limit Switches - N.C., PNP

## KX Series Linear Actuators

## Industries and Applications

Hydraulic cylinder replacement Ball screw replacement Pneumatic cylinder replacement

## Automotive

Dispensing
Automated assembly
Clamping
Food Processing
Packaging machinery
Pick and place systems

## Machining

Automated flexible fixturing
Machine tool
Parts clamping
Automatic tool changers
Entertainment / Simulation
Motion simulators
Ride automation
Medical Equipment
Volumetric pumps

## Plastics

Cut-offs
Die cutters
Molding
Formers

## Material Handling

Indexing stages
Product sorting
Material cutting
Open / close doors
Web guidance
Wire winding
Pressing
Test
Test stands

The smooth and accurate motion of Exlar's actuators combined with today's servo technology make multiple degree of freedom motion simulation applications easier to implement, cleaner and more efficient than hydraulic solutions.

## DEFINITIONS:

Maximum Force: Calculated Cubic Mean Load for the application should not exceed this value. (Values are derived from the design capacity of the FT Series actuator and should not be exceeded or relied upon for continuous operation.)

Life at Maximum Force: Estimated life that can be expected from the actuator when running at Maximum Force for intermittent periods of time. (Theoretical calculation based on the Dynamic Load Rating of the actuator and using the Maximum Force rating as the Cubic Mean Load.)
$\mathrm{C}_{\mathrm{a}}$ (Dynamic Load Rating): A design constant used when calculating the estimated travel life of the roller screw.

Maximum Input Torque: The torque required at the screw to produce the Maximum Force rating. Exceeding this value can cause permanent damage to the actuator.

Maximum Rated RPM: The maximum allowable rotational screw speed determined by either screw length limitations or the rotational speed limit of the roller screw nut.

Maximum Linear Speed: The linear speed achieved by the actuator when Maximum Rated RPM is applied to the roller screw input shaft.

## In-Postion Technologies

1. See page 169 for life calculation information.
2. Input torque should be limited such that Max Force is not exceeded. For a parallel belt ratio, the input torque ratings must be divided by the belt ratio for allowable motor torque. The output force ratings remain the same.
3. Maximum allowable actuator-generated force that can be applied routinely. Exceeding this force may result in permanent damage to the actuator. For maximum allowable externally-applied axial forces, consult factory. For high force, short stroke applications, consult factory.

## KX Series Linear Actuators

## Estimated Service Life

Service Life Estimate Assumptions:

- Sufficient quality and quantity of lubrication is maintained throughout service life (please refer to engineering reference on page 169 for lubrication interval estimates.)
- Bearing and screw temperature between $20^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$
- No mechanical hard stops (external or internal) or impact loads
- No external side loads
- Does not apply to short stroke, high frequency applications such as fatigue testing or short stroke, high force applications such as pressing. (For information on calculating
estimating life for unique applications please refer to the engineering reference on page 169.

The $L_{10}$ expected life of a roller screw linear actuator is expressed as the linear travel distance that $90 \%$ of properly maintained roller screws manufactured are expected to meet or exceed. This is not a guarantee and these charts should be used for estimation purposes only.

The underlying formula that defines this value is:
Travel life in millions of inches, where:

$$
\begin{aligned}
& \mathrm{C}_{\mathrm{a}}=\text { Dynamic load rating (lbf) } \\
& \mathrm{F}_{\mathrm{cml}}=\text { Cubic mean applied load (lbf) } \quad \mathrm{L}_{10}=\binom{\mathrm{C}_{\mathrm{a}}}{\mathrm{~F}_{\mathrm{cml}}}^{3} \times \ell
\end{aligned}
$$

For additional details on calculating estimated service life, please refer to the Engineering Reference, page 169.

## KX Series Linear Actuators

## Options

## PB = Protective Bellows

This option provides an accordion style protective bellows to protect the main actuator rod from damage due to abrasives or other contaminants in the environment in which the actuator must survive. The standard material of this bellows is S 2 Neoprene Coated Nylon, Sewn Construction. This standard bellows is rated for environmental temperatures of -40 to 250 degrees $F$. Longer strokes may require the main rod of the actuator to be extended beyond standard length. Not available with extended tie rod mounting option. Please contact your local sales representative.

## L1 ... L6 = Adjustable External Travel Switches

This option allows up to 3 external switches to be included. These switches provide travel indication to the controller and are adjustable.

Consult your local sales representative to discuss maximum stroke length allowable with your final configuration.
Some accessories are available in stainless steel. Consult Exlar for availability and lead time.
'This option restricts max. load to $6.0 \mathrm{KN}(1350 \mathrm{lbf})$ for K60, $8.9 \mathrm{KN}(2000 \mathrm{lbf})$ for K75 and $9.3 \mathrm{KN}(2100 \mathrm{lbf})$ for K90.

## Parallel Mount

 Housing Width and Rear Flange/Clevis Mount OptionsWhen selecting a parallel mount for your K Series actuator, the table at right indicates what size drive housing will be mounted to your actuator. If your application also requires a rear flange, rear clevis or rear eye, please select the appropriate attachment based on the size of the drive housing.

| Actuator Frame Size | Mounted Motor Frame Size ${ }^{1}$ | Belt Reduction Ratio | Parallel Drive Housing Width ${ }^{2}$ | Optional Rear Flange | Optional Rear Clevis | Optional <br> Rear Eye |

## KX Series Ordering Guide

Actuator Series
KX = High Capacity Roller Screw
AA = Actuator Frame Size
$60=60 \mathrm{~mm}$ (2.375 inch)
$75=75 \mathrm{~mm}$ (2.95 inch)
$90=90 \mathrm{~mm}$ ( 3.54 inch)
BBBB = Stroke Length (mm)
$0150=150 \mathrm{~mm}$ ( 5.9 inch)
$0300=300 \mathrm{~mm}$ (11.8 inch)
$0600=600 \mathrm{~mm}$ ( 23.6 inch)
$0900=900 \mathrm{~mm}$ (35.4 inch)
CC = Lead (linear motion per screw revolution)
$05=5 \mathrm{~mm}$ ( 0.2 inch)
$10=10 \mathrm{~mm}$ ( 0.4 inch)

D = Mounting Options N = None, Base Unit
$\mathrm{E}=\mathrm{Rod}$ Options
M = Male, US Standard thread
A = Male Metric thread
$\mathrm{F}=$ Female US Standard thread
$B=$ Female Metric thread
FFF = Input Drive Provisions
NMT = Drive shaft only, no motor mount
ISC = Inline, includes shaft coupling
Keyed Motor Shaft Options
P10 $=$ Paralle, 1:1 belt reduction
P20 = Parallel, 2:1 belt reduction
Smooth Motor Shaft Options
S10 $=$ Parallel, $1: 1$ belt reduction
S20 = Paralle, 2:1 belt reduction

GGG = Motor Mount Provisions ${ }^{1}$ See page 135-137 for Motor Mount Code.

MM $=$ Mechanical Options ${ }^{2}$
$\mathrm{PB}=$ Protective bellows for extending rod
Limit Switches
L1 = One N.O., PNP
L2 = Two N.C., PNP
L3 = One N.O. PNP \& two N.C., PNP
L4 = One N.O., NPN
L5 = Two N.C., NPN
L6 = One N.O., NPN \& two N.C., NPN
*See Page 129 for Limit Switch details.

## NOTES:

1. For oversized motors, contact your local sales representative.
2. For extended temperature operation consult factory for model number.

Please provide a 3D CAD model of motor with all orders to ensure proper mounting compatibility.
