Gocator 2130

POWERFUL BUILT-IN MEASUREMENT TOOLS

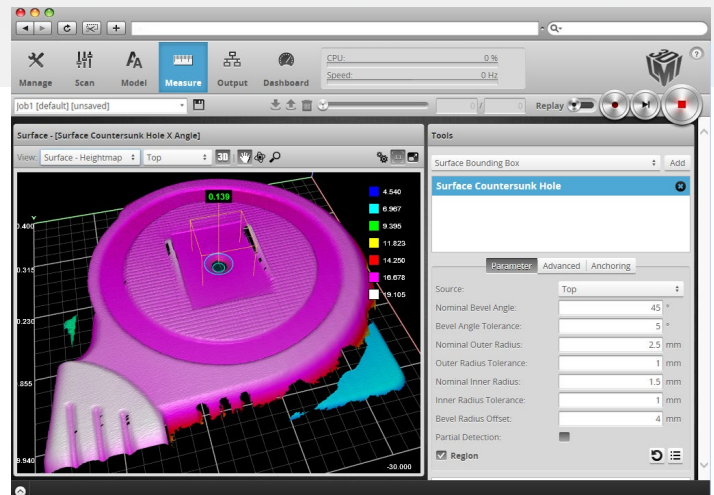

Providing the same growing set of measurement tools and real-time visualization as LMI's high-performance sensors, the Gocator 2100 series lets you solve complicated inspection problems at a much lower cost.

FLEXIBLE INTEGRATION

With its extensive output support on Gigabit Ethernet, digital and analog out, the Gocator 2100 series directly communicates with existing production line systems, minimizing engineering and maintenance costs. Built-in PLC protocols greatly simplify integration with PLCs.

STANDALONE & SCALABLE

Single sensors require no additional controllers, amplifiers or PCs. Using LMI Master hubs, you can effortlessly scale Gocator systems to multiple sensors to handle wider targets. Gocator 2100 is also fully compatible with Gocator 2300. Systems can be easily upgraded to higher resolution sensors with no adaptation or additional learning required.

Gocator's browser-based graphical user interface

EASY TO USE

Gocator's built-in, intuitive GUI lets you configure profiling settings and measurement tools using any web browser, computer or operating system. With no additional software to install, Gocator's out-of-the-box setup and configuration is fast and easy.
