*******PRESS RELEASE*******

IN-POSITION TECHNOLOGIES ACQUIRES AXIS ROBOTICS

November 1, 2018 Orangevale, CA – Axis Robotics, Inc., a system integrator based in Northern California and focused on the Electronics and Semiconductor markets is acquired by In-Position Technologies. www.axisrobotics.com

Neil Jacques, founder of In-Position Technologies, states, “We are ecstatic about bringing on Dave Kush and the Axis Robotics team. Our plan is to keep Axis Robotics located in Orangevale, so it can continue to provide cutting edge automations solutions to our clients in California and beyond. Axis Robotics will significantly improve our ability to deliver customized robotics solutions, and be a big help supporting our rapidly growing California business, especially the MECA500 Precision Robot.”

Dave Kush founder of Axis Robotics, states, Axis Robotics has been providing exceptional automation solutions to our customers in the industrial and high-tech markets for many years. Now, as a part of In-Position Technologies, we will be able to not just continue that legacy, but take it to the next level as part of a trusted and well established company with the same commitment to customer service and support. It is great to be a part of the In-Position Technologies team!”
