

MiR250

EXCEED EXPECTATIONS

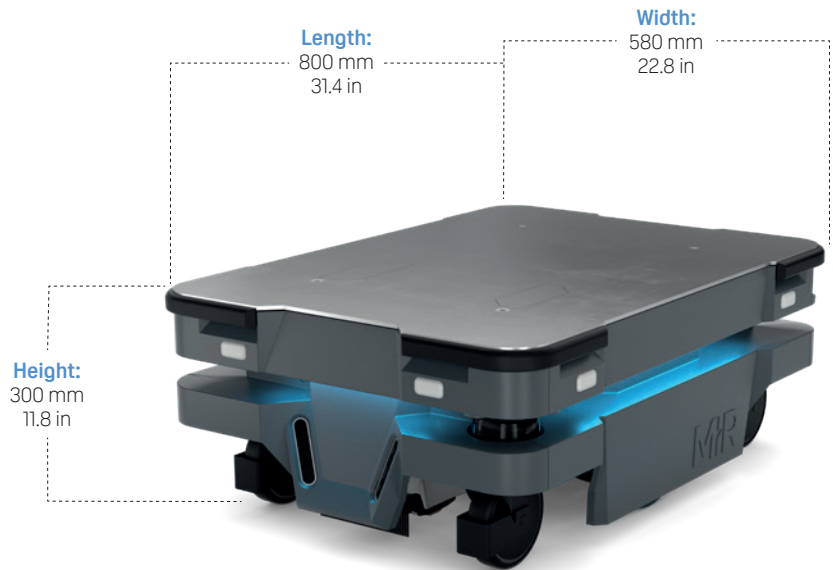

MiR250

Exceed expectations with MiR250

The **MiR250** sets new standards for internal logistics with a robot that is faster, safer and more agile than any other solution in the same category on the market.

The innovative **MiR250** is packed with the newest technology, designed for serviceability and it can navigate smoothly and efficiently in dynamic environments – and even drive through doors as narrow as 80 cm.

Advantages

- Works around the clock with fast battery swap
- Robust design ensuring long lifetime
- Easy serviceability; parts changeable from the sides
- Is designed based on present safety standards

TECH SPECS

	MiR250
Payload	250 kg / 550 lbs
Max speed	2,0 m/s
Battery run time	10 hours
Weight	83 kg / 182 lbs
Slopes	5 % incline/decline
Size in mm (L x W x H)	800 x 580 x 300
ESD version	Optional

MiR Shelf Carrier

Streamline your logistics even better

Together with the **MiR250**, we have developed a standard top module: The Shelf Carrier.

The Shelf Carrier is an anchoring device, which enables the robot to collect and deliver carts, and is available directly from MiR.

Visit our webpage to learn more about the **MiR250** and Shelf Carrier at: www.mir-robots.com
