

# GSX SERIES

INTEGRATED SERVO MOTOR AND ACTUATOR

High quality screw for longer life

Ideal hydraulic replacement

Powerful and robust

Compact size

**In-Position**  
**Technologies**

## GSX Series

### High Capacity Integrated Motor/Actuator

#### Description

For applications that require long life and continuous duty, even in harsh environments, the GSX Series actuator offers a robust solution. The life of these actuators can exceed that of a ball screw actuator by 15 times, all while delivering high speeds and high forces.

#### Sealed for Long Life with Minimum Maintenance

GSX Series actuators have strong advantages wherever outside contaminants are an issue. In most rotary-to-linear devices, critical mechanisms are exposed to the environment. Thus, these actuators must be frequently inspected, cleaned and lubricated.

In contrast, the converting components in all Exlar GSX units are mounted within sealed motor housing. With a simple bushing and seal on the smooth extending rod, abrasive particles or other contaminants are prevented from reaching the actuator's critical mechanisms. This assures trouble-free operation even in the most harsh environments.

Similarly, lubrication requirements are minimal. GSX actuators can be lubricated with either grease or recirculated oil. Recirculated oil systems eliminate this type of maintenance altogether. A GSX Series actuator with a properly operating recirculating oil system will operate indefinitely, without any other lubrication requirements.

Feature	Standard	Optional
External anti-rotate mechanism	No	Yes
Internal Anti-rotate Mechanism	No	Yes
Electric brake	No	Yes
External Limit Switches	No	Yes
Connectors	Right Angle, Rotatable	
Mounting Style	Extended Tie Rods, Side Tapped Mounting Holes, Trunnion, Rear Clevis, Front or Rear Flange	Specials available to meet OEM requirements
Rod End	Male or Female: U.S. Standard or Metric	
Lubrication	Greased, Oil Connection Ports are Built-in for Customer Supplied Recirculated Oil Lubrication	
Primary Feedback	Standard Encoders or Resolvers to Meet Most Amplifier Requirements	

Technical Characteristics	
Frame Sizes in (mm)	2 (50.8), 3 (76.2), 4 (101.6), 5.5 (139.7), 7 (177.8)
Screw Leads in (mm)	0.1 (2), 0.2 (5), 0.25 (6), 0.4 (10), 0.5 (13), 0.75 (19), 1 (25)
Standard Stroke Lengths	3 (76), 4 (102), 6 (152), 8 (203), 10 (254), 12 (305), 14 (357), 18 (457)
Force Range	103 to 11,528 lbf (458 to 51 kN)
Maximum Speed	up to 37.5 in/sec (952 mm/s)

Operating Conditions and Usage		
<b>Accuracy:</b>		
Screw Lead Error	in/ft (µm / 300 mm)	0.001 (25)
Screw Travel Variation	in/ft (µm / 300 mm)	0.0012 (30)
Screw Lead Backlash	in	0.004 maximum
<b>Ambient Conditions:</b>		
Standard Ambient Temperature	°C	0 to 65
Extended Ambient Temperature*	°C	-30 to 65
Storage Temperature	°C	-40 to 85
IP Rating		IP65S
Vibration**		3.5 grms; 5 to 520 hz

\* Consult Exlar for extended temperature operations

\*\* Resolver feedback

Ratings at 25°C, operation over 25°C requires de-rating.

## Product Features

GSX Series

# GSX Series Integrated Motor/Actuator

## Industries and Applications:

Hydraulic cylinder replacement  
Ball screw replacement  
Pneumatic cylinder replacement

### Automotive

Dispensing  
Welding  
Pressing  
Riveting / Fastening / Joining

### Food Processing

Sealing  
Dispensing  
Forming  
Pick and Place Systems  
Fillers  
Cutting / Slicing / Cubing

### Sawmill/Forestry

Saw Positioning  
Fence Positioning  
Ventilation Control Systems

### Machining

Material Cutting  
Broaching  
Metal Forming  
Tube Bending  
Stamping

### Entertainment / Simulation

Animatronics  
Training Simulators  
Ride Automation

### Medical Equipment

Volumetric Pumps  
Patient Positioning

### Plastics

Die Cutters  
Part Eject  
Core Pull  
Formers

### Material Handling

Nip Roll Positioning  
Tension Control  
Web Guidance  
Wire Winding

### Test

Fatigue Testing  
Load Simulation Testing

Repeatable force, reliable positioning accuracy, and flexible control make GSX actuators a perfect fit for assembly presses or test stands.

Repeatable force control plus positioning accuracy extends the life of costly tools when Exlar linear actuators are used for precision applications.

### DEFINITIONS:

**Continuous Force:** The linear force produced by the actuator at continuous motor torque.

**Max Velocity:** The linear velocity that the actuator will achieve at rated motor rpm.

**Friction Torque (standard screw):** Amount of torque required to move the actuator when not coupled to a load.

**Friction Torque (preloaded screw):** Amount of torque required to move the actuator when not coupled to a load.

**Min Stroke:** Shortest available stroke length.

**Max Stroke:** Longest available stroke length.

**C<sub>a</sub> (Dynamic Load Rating):** A design constant used when calculating the estimated travel life of the roller screw.

**Inertia (zero stroke):** Base inertia of an actuator with zero available stroke length.

**Inertia Adder (per inch of stroke):** Inertia per inch of stroke that must be added to the base (zero stroke) inertia to determine the total actuator inertia.

**Weight (zero stroke):** Base weight of an actuator with zero available stroke length.

**Weight Adder (per inch of stroke):** Weight adder per inch of stroke that must be added to the base (zero stroke) weight to determine the total actuator weight.

# GSX Series Integrated Motor/Actuator

## Estimated Service Life

The  $L_{10}$  expected life of a roller screw linear actuator is expressed as the linear travel distance that 90% of properly maintained roller screws manufactured are expected to meet or exceed. This is not a guarantee and these charts should be used for estimation purposes only.

The underlying formula that defines this value is:  
 Travel life in millions of inches, where:

$$L_{10} = \left( \frac{C_a}{F_{cml}} \right)^3 \times \ell$$

$C_a$  = Dynamic load rating (lbf)  
 $F_{cml}$  = Cubic mean applied load (lbf)  
 $\ell$  = Roller screw lead (inches)

For additional details on calculating estimated service life, please refer to the Engineering Reference, page 169.

### Service Life Estimate Assumptions:

- Sufficient quality and quantity of lubrication is maintained throughout service life (please refer to engineering reference on page 173 for lubrication interval estimates.)
- Bearing and screw temperature between 20° C and 40° C
- No mechanical hard stops (external or internal) or impact loads
- No external side loads
- Does not apply to short stroke, high frequency applications such as fatigue testing or short stroke, high force applications such as pressing. (For information on calculating estimating life for unique applications please refer to the engineering reference on page 169.)

## Speed vs. Force Curves

These charts represent typical linear speed versus linear force curves for the GSX actuators using common brushless motor amplifiers. The GSX Series are compatible with many different brushless motor amplifiers; any differences in the performance

ratings of these amplifiers can alter the actuator's performance. Thus, the curves below should be used for estimation only. (Further information is available by contacting your local sales representative.)

See page 22 for explanation of motor stator options (1x8, 2x8, 3x8)  
See page 7 for mechanical specifications

Test data derived using NEMA recommended aluminum heatsink 10" x 10" x 1/4" for GSX20 and 10" x 10" x 3/8" for GSX30. Testing ambient temperature 25°C.

See page 22 for explanation of motor stator options (1x8, 2x8, 3x8)  
See page 7 for mechanical specifications

Test data derived using NEMA recommended aluminum heatsink 12" x 12" x 1/2" for GSX40, 12" x 12" x 1/2" for GSX50, and 16" x 16" x 1" for GSX60.  
Testing ambient temperature 25°C.

# GSX Series Integrated Motor/Actuator

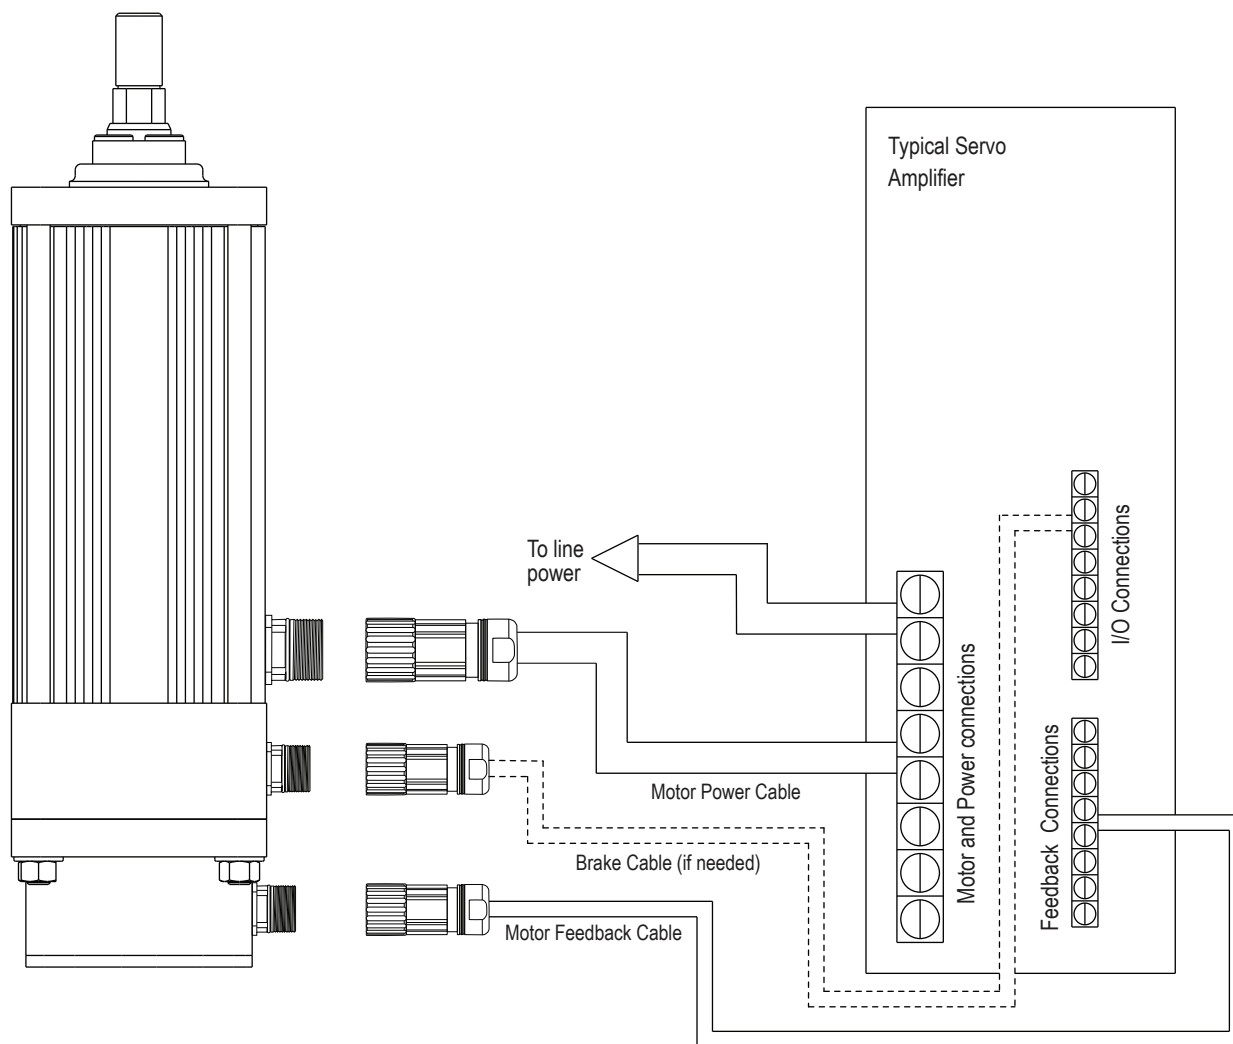

## System Configuration

GSX Series actuators include an integrated brushless servo motor. The unique design gives users a variety of feedback configuration options so GSX units can be powered by almost any brushless motor amplifier on the market.

This flexibility means GSX actuators can be incorporated into today's high performance single and multi-axis motion control

systems. For food and beverage packaging, to multi-axis turning centers, to aircraft assembly, the GSX Series units offers incredible performance and durability.

The schematic below shows typical connections for a single axis system with actuator and servo amplifier.

## Options

### AR = Anti-rotation Option

The unique design of the GSX Series of linear actuators permits the extending rod to rotate. This capability simplifies setup by allowing the user to rotate the rod in and out of the actuator for mechanical attachment or system testing.

However, this feature also requires that once setup and testing are completed, the rod be kept from rotating so proper linear motion will be maintained. In most applications the actuator's load is coupled to linear bearings, or some other support device. In these cases the load cannot rotate, so a separate anti-rotation system is not needed.

For applications in which the load is free to rotate, Exlar offers anti-rotation systems. Shorter GSX units use an anti-rotation arm on one side of the actuator. Longer strokes use arms on both sides.

### PB = Protective Bellows

This option provides an accordion style protective bellows to protect the main actuator rod from damage due to abrasives or other contaminants in the operating environment. The standard material of this bellows is S2 Neoprene coated nylon with sewn construction. This standard bellows is rated for environmental temperatures of -40 to 250 degrees F. This option requires the main rod of the actuator to be extended beyond standard length. Not available with extended tie rod mounting option. Please contact your local sales representative for details.

### RB = Rear Electric Brake

This option provides an internal holding brake for GSX Series actuators. The brake is spring activated and electrically released.

### SR = Splined Main Rod

This option provides a ball spline shafting main rod with a ball spline nut that replaces the standard front seal and bushing assembly. This rod restricts rotation without the need for an external mechanism. The rod diameter will be the closest metric equivalent to our standard rod sizes. Since this option is NOT sealed, it is not suitable for environments in which contaminants may enter the actuator.

*Note: This option affects overall length and mounting dimensions for GSX actuators. Consult your local sales representative if using splined main rod. Due to the reduced diameter of the splined main rod on the GSX50, the standard "A", "F", and "B" rod ends are not available and an "X" should be used in the model mask. Please see Actuator Rod Ends with Splined Main Rod Options on page 32 for dimensions.*

### L1, L2, L3 = Adjustable External Travel Switches

This option allows up to 3 external switches to be included with the GSX Series Actuator. These switches provide travel indication to the controller and are adjustable (must purchase external anti-rotate for this option). See page 29 for details.

# GSX Series Integrated Motor/Actuator

## Motor Speed

All Exlar T-LAM motors and actuators carry a standard motor speed designator (see chart). This is representative of the standard base speed of the motor for the selected bus voltage.

Designator	Base Speed	Actuator/Motor Series
-50	5000 rpm	GSX20
-30	3000 rpm	GSX30, GSX40
-24	2400 rpm	GSX50, GSX60

If the model number is created and the location for the motor speed designator is left blank, this is the base speed to which the motor will be manufactured. The model number can also be created including this standard speed designator.

## Feedback

### Absolute Feedback

Due to the variability in size of some feedback devices, especially absolute feedback devices which are often very large relative to the size of the actuator motor, the actual size of the actuator may differ in length and width from these drawings for feedback types other than standard resolvers and standard encoders. Please consult Exlar for details. In the event that you order an actuator that differs from these standard dimensions, you will be sent a drawing of the final configuration of your actuator.

## Motor Stators

GSX motor options are described with a 3 digit code. The first digit calls out the stack length, the second the rated bus voltage, and the third the number of poles of the motor. Refer to the mechanical/electrical specifications for motor torque and actuator rated force.

118	1 stack	115 Vrms	8 Pole	Class 180 H
138		230 Vrms		
158		400 Vrms		
168		460 Vrms		
218	2 stack	115 Vrms	8 Pole	Class 180 H
238		230 Vrms		
258		400 Vrms		
268		460 Vrms		
318	3 stack	115 Vrms	8 Pole	Class 180 H
338		230 Vrms		
358		400 Vrms		
368		460 Vrms		

\* Low voltage stators may be limited to less than catalog rated torque and/or speed. Please contact your local sales representative when ordering this option.

## Rod End Attachments

Rear Clevis Pin Rod Eye

Spherical Rod Eye Rod Clevis

See drawings on pages 30-32.

Attachments ordered separate from actuator.

## Oil Cooling and Lubrication Option

If you plan to use oil cooling with your GSX actuator, consult your local sales representative to discuss your application.

Exlar GSX actuators are normally delivered with high performance synthetic grease as a lubricant. The application of grease for the roller screw mechanism and bearings has proven adequate in thousands of applications over 25 years. However, in applications where the actuator is operated under high load, high speed and/or high duty cycle for extended periods of time, the grease will degrade prematurely and will eventually fail to provide the lubrication needed to maintain the operating efficiency and integrity of the roller screw and bearings. Continued operation of the actuator after the grease has broken down will cause premature failure of the device.

An ideal way to both lubricate and cool a GSX Series actuator in high performance applications is to flow a small amount of oil at low pressure through the actuator while it is in operation. A small amount of oil flow can, in many cases, allow operation of the actuator beyond normal continuous rated power levels. Oil flow lubrication has been used successfully and extensively in the field, allowing Exlar actuators to deliver thousands of hours of service between re-lubrication intervals even in the most arduous of applications.

Oil lubrication also significantly reduces actuator maintenance, saving valuable production time. With a recirculating oil system, lubricating oil is easily changed without having to access or

dismount the actuator. The ability to monitor oil condition can extend the usable life of the actuator by keeping the lubrication clean and fresh.

Some special application and actuator configuration considerations must be addressed prior to selecting and ordering a GSX actuator with oil lubrication. Please consult with Exlar Application Engineering prior to purchase.

A typical oil flow lubrication system involves use of a commercially available lubrication pump and plumbing to recirculate the oil. A schematic example of a possible oil system is shown below. Exlar Application Engineering can assist you in the development of an appropriate oil system, or recommend a pre-packaged oil circulation system.

**If you plan to use oil cooling with your GSX actuator, please consult Exlar to discuss your application.**

**Oil pressure within the actuator should never exceed 5 psi.**

**The Oil cooling option will limit maximum actuator acceleration.**

øH	0.37 (9.40)	0.50 (12.7)	0.50 (12.7)	1.00 (25.4)

A second anti-rotate arm is used on GSX20, GSX30, and GSX40 models with 10 inch and longer stroke lengths.

GSX60 uses a single sided anti-rotate for all stroke lengths.

## Anti-rotation Option GSX50

NOTE: GSX50 actuators use one arm for all stroke lengths.

Pre-sale drawings and models are representative and are subject to change. Certified drawings and models are available for a fee. Consult your local Exlar representative for details.

## External Limit Switch Option

The external limit switch option (requires anti-rotate option) for the GSX Series of linear actuators provides the user with 1, 2, or 3 externally mounted adjustable switches for use as the end of travel limit switches or home position sensors.

The number of switches desired is selected by ordering the L1, L2, or L3 option, in which 1, 2 or 3 switches will be provided, respectively.

The switches are 9-30 VDC powered, PNP output, with either normally open or normally closed logic operation depending on the switch configuration ordered. Switches are supplied with 1 meter of 3-wire embedded cable. Below is a diagram indicating which logic operation will be provided for each switch, based on the option ordered.

Dim A	3 inch (76 mm) stroke in (mm)	6 inch (152 mm) stroke in (mm)	8 inch (203 mm) stroke in (mm)	10 inch (254 mm) stroke in (mm)	12 inch (305 mm) stroke in (mm)	14 inch (355 mm) stroke in (mm)	18 inch (457 mm) stroke in (mm)

<b>GSX40</b> in (mm)	1.500 (38.1)	0.750 (19.1)	0.906 (23.0)	0.381 (9.7)	0.875 (22.2)	1.000 (25.4)	3/4 – 16 UNF – 2A	M16 x 1.5 6g	5/8 – 18 UNF – 2B	M16 x 1.5 6H
<b>GSX50****</b> in (mm)	1.625 (41.3)	1.000** (25.4)	1.102 (28.0)	0.750*** (19.1)	1.102 (28.0)	1.500 (38.1)	1 – 14 UNS – 2A	M24 x 2 6g	3/4 – 16 UNF – 2B	M20 x 1.5 6H
<b>GSX60</b> in (mm)	2.500 (63.5)	1.250 (31.8)	1.850 (47.0)	0.550 (14.0)	1.625 (41.3)	1.750 (44.5)	1 1/4 – 12 UNF – 2A	M30 x 2 6g	7/8 – 14 UNF – 2B	M25 x 1.5 6H

\* When Male, Metric (A), Dimension A = 1.575 (40 mm)

\*\* When Male, Metric (A), Dimension B = 0.945 (24 mm)

\*\*\*When Male (M or A) = 0.500 in (12.7 mm)

\*\*\*\*When GSX50 is ordered with a splined rod thread, dimensions are different in accordance with the table.

Part numbers for rod attachment options indicate the through hole size or pin diameter. Before selecting a spherical rod eye please consult the information on the anti-rotation option for the GSX actuators. Spherical rod eyes will allow the rod to rotate if the load is not held.

## Clevis Pin Dimensions

	A	B	C	$\phi D$	$\phi E$
CP050 <sup>1</sup> in (mm)	2.28 (57.9)	1.94 (49.28)	0.17 (4.32)	0.50 <sup>-0.001/-0.002</sup> (12.7 mm +0.00/-0.05)	0.106 (2.69)
CP075 <sup>2</sup> in (mm)	3.09 (78.5)	2.72 (69.1)	0.19 (4.82)	0.75 <sup>-0.001/-0.002</sup> (19.1 mm +0.00/-0.05)	0.14 (3.56)
CP100 <sup>3</sup> in (mm)	3.59 (91.2)	3.22 (81.8)	0.19 (4.82)	1.00 <sup>-0.001/-0.002</sup> (25.4 mm +0.00/-0.05)	0.14 (3.56)
CP138 <sup>4</sup> in (mm)	4.66 (118.3)	4.25 (108)	0.20 (5.08)	1.375 <sup>-0.001/-0.002</sup> (34.93 mm +0.00/-0.05)	0.173 (4.39)
CP175 <sup>5</sup> in (mm)	5.656 (143.6)	5.25 (133.3)	0.203 (5.15)	1.750 <sup>-0.001/-0.002</sup> (44.4 mm +0.00/-0.05)	0.173 (4.39)

<sup>1</sup> Fits GSX20 and GSX30 rear clevis, RC1050 and RE1050

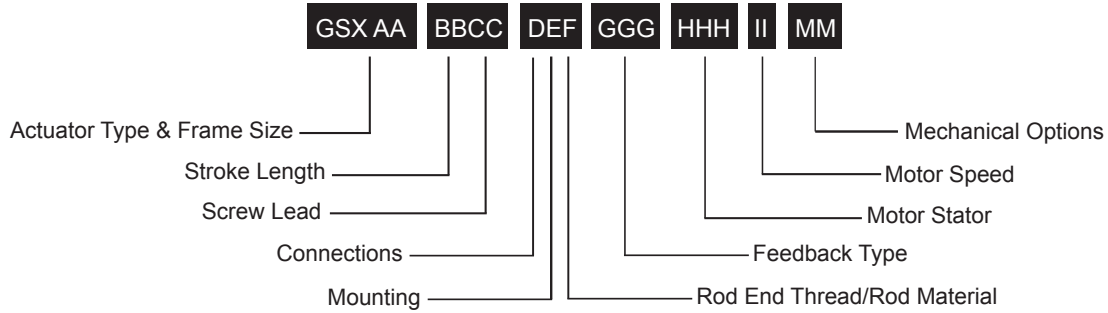

<sup>2</sup> Fits GSX30, 40 and RC075, RE075 and SMR075

<sup>3</sup> Fits GSX50 rear clevis, RC100, RE100

<sup>4</sup> Fits RC138, RE138

<sup>5</sup> Fits GSX60 rear clevis

Pre-sale drawings and models are representative and are subject to change. Certified drawings and models are available for a fee. Consult your local Exlar representative for details.

**AA = GSX Actuator Frame Size (Nominal)**

- 20 = 2 in (50.8 mm)
- 30 = 3 in (76.2 mm)
- 40 = 4 in (101.6 mm)
- 50 = 5.5 in (139.7 mm)
- 60 = 7 in (177.8 mm)

**BB = Stroke Length**

- 03 = 3 in (76 mm) GSX20, GSX30
- 04 = 4 in (102 mm) GSX40
- 06 = 5.9 in (150 mm) GSX30; 6 in (152 mm) GSX20, GSX40, GSX50, GSX60
- 08 = 8 in (203 mm) GSX40
- 10 = 10 in (254 mm) all models
- 12 = 12 in (305 mm) GSX20, GSX30, GSX40
- 14 = 14 in (356 mm) GSX30, GSX50
- 18 = 18 in (457 mm) GSX30, GSX40

**CC = Screw Lead**

- 01 = 0.1 in (2.54 mm) (GSX20, GSX30, GSX40, GSX50)<sup>9</sup>
- 02 = 0.2 in (5.08 mm) (GSX20, GSX30, GSX40, GSX50)
- 03 = 0.25 in (6.35 mm) (GSX60)
- 04 = 0.4 in (10.16 mm) (GSX20 only)
- 05 = 0.5 in (12.7 mm) (GSX30, GSX40, GSX50, GSX60)
- 08 = 0.75 in (19.05 mm) (GSX40)<sup>5</sup>
- 10 = 1.0 in (25.4 mm) (GSX50, GSX60)<sup>6</sup>

**D = Connections**

- I = Exlar standard M23 style<sup>7</sup>
- M = Manufacturer's connector<sup>3</sup>

**E = Mounting**

- C = Rear clevis
- F = Front flange
- R = Rear flange
- D = Double side mount<sup>13</sup>
- T = Side trunnion
- E = Extended tie rods
- K = Metric double side mount<sup>13</sup>
- Q = Metric side trunnion
- M = Metric extended tie rods
- G = Metric rear clevis

**F = Rod End Thread / Rod Material**

- M = Male, US standard thread
- A = Male, metric thread
- F = Female, US standard thread
- B = Female, metric thread

**GGG = Feedback Type**

See page 164 for detailed information.

**HHH = Motor Stator – 8 Pole<sup>1</sup> Class 180H<sup>12</sup>**

- 118 = 1 stack, 115 Vrms
- 138 = 1 stack, 230 Vrms
- 158 = 1 stack, 400 Vrms
- 168 = 1 stack, 460 Vrms
- 218 = 2 stack, 115 Vrms
- 238 = 2 stack, 230 Vrms
- 258 = 2 stack, 400 Vrms
- 268 = 2 stack, 460, Vrms

- 318 = 3 stack, 115 Vrms
- 338 = 3 stack, 230 Vrms
- 358 = 3 stack, 400 Vrms
- 368 = 3 stack, 460 Vrms

**II = Motor Speed**

- 24 = 2400 rpm, GSX50, GSX60
- 30 = 3000 rpm, GSX30, GSX40
- 50 = 5000 rpm, GSX20

**MM = Mechanical Options<sup>15</sup>**

- AR = External anti-rotate assembly<sup>11</sup>
- RB = Rear electric brake<sup>2</sup>
- PB = Protective bellows<sup>10</sup>
- SR = Splined main rod<sup>8, 12, 14</sup>
- L1/L2/L3 = External limit switches<sup>4</sup>

**NOTES:**

1. Stator voltage and pole options allow for catalog rated performance at varying amplifier bus voltages and pole configuration requirements. Refer to performance specification on pages 7-9 for availability of 3 stack stator.
2. The brake option may require a third cable, consult local sales representative.
3. Available as described in Feedback Types.
4. Requires AR option.
5. 0.75 lead not available above 12 inch.
6. 1.0 lead not available above 10 inch stroke.
7. GSX60 uses M40 size 1.5 power connector.
8. If not otherwise specified by the customer, an M24X2 male rod end will be used on the GSX50. See note on page 30.
9. 0.1 lead not available over 10" stroke on GSX50.
10. N/A with extended tie rod mounting option.
11. A second anti-rotate arm is used on GSX20, 30 and 40 for 10 inch and longer stroke.
12. See page 22 for optimized stator offerings.
13. Anti-rotate with D or K mount N/A on 10 inch or longer stroke except in GSX50.
14. Not available in Stainless Steel.
15. For extended temperature operation consult factory for model number.
