**CBC080 Curve Belt Conveyors are the preferred solution for maintaining product orientation when a turn is required**

They guide product around the turn, maintaining the same orientation at both infeed and outfeed. CBC080 conveyors are engineered to transition product seamlessly with our AS40 family of conveyors.

The conveyor's conical pulley and drive system are maintenance-free. Guide rollers flip out of the way while staying attached to allow the belt to be changed in less than 20 minutes. A low-noise design based on an aluminum frame allows them to operate in any environment.

Motion06 is a worldwide leader in complete belt conveyor solutions, excelling especially in belted curves. Both Motion06 and QC Conveyors are members of the Duravant Material Handling group.

The unique belt guide design improves durability over traditional designs

## Specifications

**Widths:** Up to 24"

**Angles:** 30°, 45°, 60°, 90°, 180°

**Speed:** Up to 354 FPM at centerline

**Load:** Up to 110 lbs

 **QC Conveyors**  
A DURAVANT COMPANY
